

St Mark's Coptic Orthodox College

Learning Goals 2020-2022

A Christ-centred learning environment

With Christ at the centre of all we do, our learning environments will continue to be filled with love and respect for teachers and students.

Lessons with intent

Every lesson has a purpose on the learning journey. Backed by research, our learning will be 'backward mapped' and the intention of every lesson made clear.

Innovative pedagogy and technology

As the College continues to grow in its implementation of technology, lessons will incorporate a greater experimentation with innovative pedagogy and technology.

Shared instruction

Through formal and informal collaboration, teachers will share instructional methodologies and seek improvement in their pedagogical practice.

Deep learning and critical thinking

Through an engagement in deep learning processes, students will be encouraged to be critical thinkers and will demonstrate a deeper understanding of concepts.
